

# Rebel<sup>®</sup> Service & Troubleshooting

## Course Description

Learn the product features, installation requirements, and service procedures for the Daikin Rebel units, including Rebel Inverter technology in this 1-day in-person class.

Students should have an understanding of the refrigeration cycle, basic electronics, and simple control circuits. The course will use these basic concepts to develop an understanding of the Daikin Rebel products. We recommend that students review **IM-1125** and **OM-1141** prior to the start of class.

Visit [www.daikinapplied.com](http://www.daikinapplied.com) and enter **1125** and **1141** in the search field.

**Principles of Rebel Service Curriculum online curriculum is a prerequisite to attend Rebel Service & Troubleshooting.**

**Either MicroTech III or MicroTech 4 Service & Troubleshooting ILT is a required prerequisite to attend Rebel Service & Troubleshooting.**

## Learning Outcomes

- Perform the appropriate tasks to resolve service and troubleshoot operational Rebel issues
